Ordered: 3/14/2023 Ordered By: JAC

Tests Performed

OCT Macula - Bilateral

Ordered: 3/14/2023

Eye: Both Eyes

Location: OU

Reviewed: Electronically Signed by: Jacqueline A. Crow, O.D. 3/14/2023

Findings: OD Drusen with RPE and outer retinal atrophy, stable

OS Drusen with large PED, stable

Plan: OCT of the macula performed.

Notes: See diagnosis, assessment, and plan for additional details.

Indication: Macular Degeneration

Diagnosis And Plan

H00.025 Hordeolum internum left lower eyelid OS

Assessment: Examination revealed internal hordeolum.

Plan: d/c gentamicin, e-mycin, oflox

start

w.c. bid+ RLL followed by maxitrol ung bid RLL x 14 days

doxycycline one 50mg capsule bid PO x 14 days

Diagnosis And Plan

call if worsens or n/i

H35.3132 Nonexudative age-related macular degeneration bilateral inte OU

Assessment: Examination reveals atrophic macular degeneration.

Plan: pt here for hordeolum but vision decreased in each eye

TODAY: mac oct ou
scans are stable from last visit

cont to monitor

call if changes noted

Z96.1 Presence of intraocular lens OU

Assessment: Patient is pseudophakic.

Plan: Continue to monitor patient as needed.

Goals

Maintain Vision [G]

Date: 3/14/2023 Code: H35.31
